

Nursing Process

Supporting data: subjective and objective _____

Subjective: What the patient reported _____

Objective: What is observed; things that can be seen or measured i.e. x-rays, labs _____

Nursing Diagnosis (NANDA)/related to/as evidenced by: _____

NANDA: What is the problem? _____

Related to: Why do they have this problem? _____

As evidenced by: What was seen by nursing student or what the patient verbally said to the nursing student; this information is pertinent assessment data. _____

Short-Term Goal: Measurable by and during time nursing student is in clinical; What are some smaller goals that will assist your patient in reaching the bigger, long-term goal. _____

Long-Term Goal: Measureable and attainable by D/C; this is the overall goal. Try to plan this first.
What do you want your patient to be able to do in the long run? _____

Priority Nursing Interventions with Rationale

1.

2.

*What are you going to do to assist the patient in doing to reach the goals?
This can include patient education.*

3.

Evaluation of Interventions

1.

2.

*Were each of the goals met and how (evidence)? If the goals were not met,
is the patient progressing towards goal.*

3.

Evaluation of Goals:
